Craps Quick Sheet

All winning bets pay even money unless otherwise indicated.

PASS LINE BET

- If the first dice roll by the shooter adds up to 7 or 11, you win. If the first roll is 2, 3 or 12, you lose. If any other number is rolled, that number is the "point". If the "point" is rolled again by the same shooter before a 7 is rolled, you win. If a 7 is rolled first, you lose.

DON'T PASS BET

- This is the opposite of PASS bets with one exception. A 3 or 12 are you winning numbers, 2 is a stand-off (this is the exception and nobody wins on it), and 7 or 11 are losers. On subsequent rolls (if a "point" has been created), you lose if the "point" is made first and you win if a 7 is rolled first.

COME BET

- This is similar to a PASS bet except that it must be made after the first roll has been made and a "point" has been made. Any number rolled becomes "your point". This must

DON'T COME BET

- This is the opposite of a COME bet. You lose if "your point" comes up and you win if a 7 comes up.

FIELD BET

- Here you are betting that on the next roll, a 2, 3, 4, 9, 10, 11 or 12 will show. You lose if a 5, 6, 7 or 8 show. If a 2 or 12 show, the payoff is 2/1

7 BET

- You win (payoff is 5/1) if a 7 is rolled on the next roll.

6 & 8 BETS

- You win if a 6 or 8 show before a 7 is rolled.

HARD WAY BET

- Here you are betting that the dice will come up exactly the same as they are shown on the layout before a 7 is rolled. A HARD WAY bet pays much higher odds (as marked), but if the number you choose comes up in any other combination of dice, you lose.

PROPOSITION BET

- If a 3 or 11 is rolled on the next roll, you win at 15/1. If a 2 or 12 is rolled on the next roll, you win at 30/1. These bets are not marked on the layout.

ANY CRAPS BET

- You win if a 2, 3 or 12 come up on the next roll. This pays 8/1.

PLACE BET

- Here you are betting on the "point" as an individual number (4, 5, 6, 8, 9 or 10). The odds against making these points vary. To play these points, you must bet a multiple of the odds. For example: If the odds pay 3/2, you must bet a multiple of 2 of your choice. 6 & 8 pay 6/5, 5 & 9 pay 3/2, 4 & 10 pay 2/1.
